Update from ECCC meeting of Tues., April 1, 2014, regarding the use of AP and transfer courses in the Basic Program.

ECCC has voted and approved that **the most recent course and grade will be used in BP and BP GPA calculation.**

An Example: A student bringing in Chem AP course credit and then decides to take the same Chem course at ISU, the student forfeits the use of their AP course once they complete their Chem course at ISU.

An Example: Student transfers in BP course with grade of C and then retakes course at ISU and earns a lower grade such as a D+, the most recent course and grade will be used in BP and BPGPA calculations.
