Basic Program credit deficiency policies from ECCC:

**Engr 101 – Courses that CANNOT be used for course to be waived:**
- AGEDS 110 – per e-mail 6/10/13 (updated 12/2/13)
- C E 101 taken S10 or later
- Con E 120 taken Summer 08 or later
- Dsn S 110, 111, 115, or 131 taken S12 or later
- Mteor 112X – updated 4/9/13

**Engr 101 – Courses that can be used for course to be waived:**
- Biol 110 – updated 12/2/13
- Chem 101X – updated 3/15/13
- LAS 101 – per e-mail on 6/10/13 (updated 12/2/13)
- TSM 110 – per e-mail on 2/21/14
- ENSCI 110 – per e-mail on 2/21/14
- BUSAD 101 – per e-mail 3/5/14

**Engr 101 Waived:**
- Automatically for students who transfer in with a previously earned degree from a four-year institution.
- Automatically for students who transfer in from another external college or university with 24 or more credits. Technical credits do not count.
- For internal university transfer student with 24 or more credits. Technical credits do not count. Backdate this policy to when transfer policy went into effect (Fall 2009)
- If student has taken another orientation course in another ISU college that contains University policies and procedures (This must be indicated in the catalog course description).
- If Com S 101 is taken for R credit, course may be applied for Engr 101 (If course has any credit count, then it needs to be waived since we do not want the credit(s) to count in the Basic Program.)

**Math and Chem:**
ECCC Committee will handle sub requests for Math & Chem (i.e. Chem 163 for 167 or Math 160 for 165) on a case by case basis with dept. justification.

**Courses that CAN be used to meet the Chem, Math, Phys and Engl credit deficiencies –**
- Chem and Math – any 100-level and above Math, Phys, Biol, and Chem course that does not involve a remedial course (i.e. Math 140, 141, 142, Chem 155). Engr 170 may be used.
- Math 165/166 – Can use Com S 200-level course
- Phys 221 – any 200-level and above Physics, Math or Chem course; Phys 241/242 for Phys 221/222
- English 150/250 cr. defic. – only 100-level and above SSH/Gen Ed courses that do not involve a remedial course can be used (Engl 101, Engl 100? cannot be used).
- Lib 160 cr. defic. - use any excess course credits—no remedial courses can be used (Psych 131 & Hon 121 can be used per ECCC); (Engr 101 (EGR 100) transferred in from Kirkwood can be used to meet the cr. defic. per ECCC); (Con E 112 cannot be used)
- Engl and Lib 160 - U ST courses we can use

**Courses that CANNOT be used for credit deficiency:**
Remedial courses—i.e. Math 140, 141, 142, Chem 50, Com S 103, 104, Engr 131, Engl 10, 099(L,R,S), 100, 101(B, C, D, I) Engr 170 cannot be used for Phys 221

Definition of “remedial” updated 11/5/13 by ECCC:
If
1. we use the definition I (Larry Genalo) stated for any department where engineering students are required to take a course (math, chem, physics, English – some require statistics so that’s a department decision) – nothing
“lower” than the required starting course (Phys 106 cannot be applied since 221 is the requirement; Engr 110 and 220 cannot be applied since the catalog description states they cannot be used toward graduation; Chem 155 cannot be applied only Chem 165 can be applied)

2. in other departments it must be a 100 level or higher

The Basic Program Requirement on the degree audit runs with different criteria to be met than the Basic Program Audit Report. The Basic Program Audit Report doesn’t check that the credits needed for each sub-requirement is met. So for a transfer student the Basic Program Audit Report will go “OK” if the student is short credits but the degree audit will say “NO” until the credit deficiencies are made up.

Transfer students cannot apply a course with a grade less than a C unless ECCC approves it even if the dept. approves it. Adviser and student must petition ECCC via Paul Castleberry.

Credit Deficiency Policy for Lib 160

Is the course from a department where we specify a course in the Basic Program?

Yes

Is the course at a level higher than the BP required course i.e. Chem at least 167 level, Engl at least 150 level, Engr at least 160 level, Math at least 165 level or Phys at least 221 level?

Yes

No

Is course remedial (not used for any degree program at ISU)?

Yes

No

Cannot use

Send through credit deficiency request

No

No
Engr 101 Flowchart for Students Transferring from other ISU Colleges and Transfer Students with at least 24 credits (excludes career/technical transfer credits)---Approved by ECC

effective Fall Semester 2009

Has student successfully completed Engr 101?

- Yes
  - Complete

- No
  - Adviser submits a DARS exception waiver request

Engr 101 Flowchart for Students Transferring from other ISU Colleges and Transfer Students with less than 24 credits (excludes career/technical transfer credits)---Approved by ECC

effective Fall Semester 2009

Has student successfully completed Engr 101?

- Yes
  - Complete

- No
  - Has student taken an orientation course at ISU (MUST contain university policies and procedures info)?
    - Yes
      - Adviser submits a DARS exception waiver request
    - No
      - Student takes Engr 101 or can petition ECC to use their orientation course
