Marston Hall

Marston is the administrative home of the College of Engineering. On the first floor, you will find several resources, including the office of the Dean for the College of Engineering, Jonathan Wickert. In room 110 you will find the Engineering Undeclared advising office. Around 20% of engineering students come in undeclared, meaning if you are not sure what you want to major in, you will not immediately fall behind your peers. Every freshman takes a class called Engineering 101 which introduces all of the different engineering majors. Advisors will also work with you one-on-one to figure out what engineering major fits you best.

Also on the first floor you will find the Engineering International Programs Office. They will help you find programs around the world that will have classes that will transfer back to ISU and count towards your degree.

On the 3rd floor you will find the engineering Career Services Center. It is their job to help you get an internship or a job offer after graduation. To help, they offer resume and cover letter workshops and mock-interviews. Engineering Career Services also host the fall and spring career fair which take place in Hilton Coliseum. The fall career fair is one of the largest in the nation. The 3rd floor also contains 20 high-end interview suites – more than 4,000 interviews are conducted on campus each year.

Other Info:

- Study abroad:
  - Many courses abroad are taught in English, although a few of them do require knowledge of another language.
  - Study abroad during the school year or during the summer.

- Engineering Career Services Center (3rd Floor):
  - Fall 2010 Career Fair attracted 210 companies
  - Over 800 interviews done the day after the career fair on campus
