TRANSFER STUDENT VISIT DAYS

We know you might like to visit campus for either the first time or one more time before you make your decision. While we are unable to host visitors on campus at this time, we have created a virtual campus visit experience just for transfer students. Check out the opportunities to connect with other incoming students and register today...

TRANSFER STUDENT ORIENTATION

Orientation is NOT the same thing as a visit day - it is a vital part of getting ready to be an ISU engineering student. When you attend orientation, you will have a meeting with your academic advisor where you register for your first semester’s classes. Sign up now if you have been accepted to continue your studies at Iowa State during 2020. After you accept your offer of admission, orientation information and registration details are sent to you. Be prepared to attend orientation by...

1) Knowing which engineering major you want to pursue.
2) Taking the online ALEKS math assessment prior to orientation, if required.

Orientation programs are currently being held online. You will receive additional information from New Student Programs about orientation options once you accept your offer of admission.

Iowa State Student Organization Highlight:

**CSE Club**

**CSE (Computer Science and Software Engineering) Club**

The CSE (Computer Science and Software Engineering) club provides a great way for those passionate about technology to connect with other students, faculty members, and industry professionals. At meetings we do all things related to computer science and software engineering, which includes programming-related presentations, company talks, interview practice, coding competitions, social events, and professor presentations. We meet Wednesday nights at 6 PM in Hoover 1312! If you are interested, please join our discord where we announce various events, forwards important messages from potential employers and faculty members.

TEAM Software

TEAM Software Company Overview

TEAM software develops financial, operations and workforce management solutions for contractors with distributed workforces of any size, with a focus on building service and security industries. TEAM’s efficiency-enhancing technology transforms business management and drives profitability. The company’s industry-specific solutions range from a complete enterprise software ecosystem to a right-sized workforce management toolset that connect key components of customers’ businesses. Founded in 1989, TEAM is an Omaha, Nebraska-based technology company with more than 400 customers across North America and Australia.

What is unique about TEAM Software?

As one of our founders puts it, we’re a 30-year-old company with a startup mentality: we’ve got the energy and passion of a young tech company with the experience of a trusted, reputable industry mainstay. It’s a combination that’s helped us remain a leading provider of technology solutions for contractors in the building service and security industries. We develop integrated cloud-based solutions ranging from financial, operations and workforce management, to time and attendance, to employee and customer self-service portals. Our web- and mobile-enabled applications are designed to help our clients profit from efficiency.

Our “startup” mentality is driven by a culture of ownership, which is a guiding principle that helps us consistently improve, grow and thrive. Our culture empowers us to pursue innovation and collaboration and fuels our commitment to clients. We’re a diverse group of doers and dreamers, and we’re looking for people who don’t just want a paycheck. We want skilled individuals interested in building long-term careers and upholding our culture. For us, culture-fit is almost more important than the bullet points on your resume. Sure, experience and skills are a necessary part of the equation, but a can-do attitude and curiosity are what make the superstars shine. And once we find a superstar, we’re going to hang on to them. We do that by respecting, trusting and supporting each other in an environment that embraces a work-life balance.

What Engineering Division(s) TEAM software hire?

TEAM software hires:

- Software Development Engineers
- Database Engineers
- Information Technology Engineers (Network and Systems Engineers)
- Sales Engineers
- Quality Engineers/Test Engineers

Our formula for happy employees is pretty simple: Hire talented people. Challenge, trust and motivate. Watch them accomplish remarkable things. Reward and recognize a job well done.

Come for the job. Stay for the Culture. TEAM is committed to creating a diverse environment and is proud to be an equal opportunity employer. TEAM also participates in the E-Verify program.

Company Highlight:

TEAM Software

What is TEAM Software looking for when hiring and engineering intern/full-time employee?

In the past, TEAM Software has only hired Software Engineering interns, but TEAM Software is seeking for an ambitious Web Developer Intern to join their growing company. Ideal candidates will be passionate and innovative rock stars that want to gain exposure on a variety of tasks related to front-end design and code.

Qualifications

• Familiarity with knowledge regarding React/React Native, Angular JS, Web API, Bootstrap, and .NET languages
• Exposure to Android / IOS and non-relational data-bases
• Proficient in VSTS/GIT
• Possess a high initiative to learn and work well in a team environment
• Ability to plan and execute responsibilities with minimal guidance
• Be enrolled in a Computer Science (or related) Program and obtain a GPA of 3.0 or above. Perform by self-motivation and be results-driven
• Ability to multitask with precision

What Engineering challenges does TEAM Software face?

• Maintaining, upgrading, and innovating a broad product offering that uses a wide variety of technology.
• Coordinating development efforts for a system with engineers in four continents. Providing a high availability solution - our software has to be always on for the hundreds of thousands of employees that rely on it to do their job.
• Integrating separate software systems across three different continents including across multiple hosting providers (in-house, Azure, Amazon), regulatory and compliance issues that have to be maintained and updated. How to bring our data and analytics platforms into the future and provide Machine Learning and AI solutions to help our customers solve their problems. This is very much from the data prospective but just the tip of the iceberg. Keeping our existing platforms running and customers happy while investing into the future to help support future mergers and acquisitions.

ON FACEBOOK?

Join our E-APP Facebook group to stay connected to what’s going on in the College of Engineering and across the Iowa State University campus. Highlights include events, awards, class projects, and competitions. We’ll try to post new items at least once each week.

TRANSFER ADMISSION PROCESS CHECKLIST

Keep up on important deadlines -- stay on track by following the guidelines recommended on the transfer application checklist. As an E-APP member, you are one step closer to being admitted to Iowa State, but you must still officially apply for admission. You can complete that first step as early as one year in advance of your intended ISU start date.
