TRANSFER STUDENT VISIT DAYS

We know you might like to visit campus for either the first time or one more time before you make your decision. While we are unable to host visitors on campus at this time, we have created a virtual campus visit experience just for transfer students. Check out the opportunities to connect with other incoming students and register today...

TRANSFER STUDENT ORIENTATION

Orientation is NOT the same thing as a visit day - it is a vital part of getting ready to be an ISU engineering student. When you attend orientation, you will have a meeting with your academic advisor where you register for your first semester’s classes. Sign up now if you have been accepted to continue your studies at Iowa State in spring 2021. After you accept your offer of admission, orientation information and registration details are sent to you. Be prepared to attend orientation by...

1) Knowing which engineering major you want to pursue.
2) Taking the online ALEKS math assessment prior to orientation, if required.

Orientation programs are currently being held online. You will receive additional information from New Student Programs about orientation options once you accept your offer of admission.

American Society of Mechanical Engineers (ASME)

The American Society of Mechanical Engineers is a worldwide membership organization that promotes the art, science, and mechanical engineering practice. The Iowa State University section of ASME is entirely student-run. It provides student members with the opportunities to grow beyond the classroom with activities such as industry-sponsored meetings, extended learning workshops, professional development conferences, community outreach, and design competitions.

The ASME ISU Chapter dedicates weekly meetings to networking with companies and learning about Ames and nationwide engineering companies. Company representatives frequently participate in our regularly scheduled events to meet ASME members and learn more about members’ participation in the chapter’s activities and present internship or potential job opportunities. These are great opportunities to have one-on-one interactions with company recruiters.

If you have any questions about ASME, email iastateASME@gmail.com

Epic

Epic Company Overview
Epic develops software to help people get well, help people stay well, and help future generations be healthier. We hire smart and motivated people from all academic majors to code, test, and implement healthcare software that hundreds of millions of patients and doctors rely on to improve care and ultimately save lives around the globe. Staff do not need healthcare experience; we train you to be an expert in health IT and provide you with personal development classes to grow as a professional. Our expectations for you are high, but in healthcare so are the stakes. We pride ourselves on being the place that companies turn to when they need innovative solutions. We are also one of only nine companies in Iowa that have achieved recognition from OSHA in their Safety and Health Recognition Program for small businesses.

What Engineering Division(s) does Epic hire?
We like folks who can think deeply and find solutions to complex problems – we find those people across a wide range of engineering disciplines, from aerospace to systems, industrial to software.

What is unique about Epic?
Two things: Impact and culture. The work we do impacts the lives of 250 million patients around the world, so at Epic you have an opportunity to make a real and tangible difference with your work. At the same time, Epic’s culture promotes ownership but is still laidback and fun.

What engineering challenges does Epic face?
Big picture: How can our software and processes help providers manage national health crises, such as childhood obesity or the opioid epidemic? How do we synchronize health data collected over many years, and present physicians with the information that they need to know now in order to make the right patient care decisions? It’s our obligation to make sure our software works for everyone – regardless of their language, socio-economic status, education level, and even the ability to use a mouse and keyboard. Other challenges: Much of the data we work with is unstructured and, although standards exist, they are interpreted differently across systems. Navigating the intersection of safety, security, regulatory needs, and the laws for individual states and countries.

Epic

What is Epic looking for when hiring and engineering intern/full-time employee?
We’re looking for folks with aptitude. You’ll be tackling problems that matter on a regular basis, and your capacity to solve tricky questions will put you ahead of the rest.

Additional information you’d like to share?
Every five years you work here, you get to go on a four-week sabbatical anywhere in the world. If you go somewhere you’ve never been before, Epic will help pay your way.

ON FACEBOOK?
Join our E-APP Facebook group to stay connected to what’s going on in the College of Engineering and across the Iowa State University campus. Highlights include events, awards, class projects, and competitions. We’ll try to post new items at least once each week.

TRANSFER ADMISSION PROCESS CHECKLIST
Keep up on important deadlines – stay on track by following the guidelines recommended on the transfer application checklist. As an E-APP member, you are one step closer to being admitted to Iowa State, but you must still officially apply for admission. You can complete that first step as early as one year in advance of your intended ISU start date.
