TRANSFER STUDENT VISIT DAYS

We know you might like to visit campus for either the first time or one more time before you make your decision. While we are unable to host visitors on campus at this time, we have created a virtual campus visit experience just for transfer students. Check out the opportunities to connect with other incoming students and register today...

TRANSFER STUDENT ORIENTATION

Orientation is NOT the same thing as a visit day - it is a vital part of getting ready to be an ISU engineering student. When you attend orientation, you will have a meeting with your academic advisor where you register for your first semester’s classes. After you accept your offer of admission, orientation information and registration details are sent to you. Be prepared to attend orientation by...

1) Knowing which engineering major you want to pursue.
2) Taking the online ALEKS math assessment prior to orientation, if required.

Orientation programs are currently being held online. You will receive additional information from New Student Programs about orientation options once you accept your offer of admission.

Web Development Club

The web development club is a group of students interested in learning about the development of modern websites using HTML/CSS/JavaScript. The club meets every Tuesday from 6-7pm in Pearson 1106 and has a discord for those that want to attend virtually. The purpose of the Web Development Club is: to promote learning and professional growth in the field of web development; to establish a network of like-minded individuals who want to pursue web development; to give back to the Iowa State University community and local community by offering web development services to students, faculty, and clubs and organizations; and to give back to the greater web development community by writing and posting public code libraries, extensions, plugins, etc. This club is a great way to develop your skills in web development and take a deeper dive into front-end programming!
Company Highlight:

Metalcraft

Overview
Metalcraft is a member-owned identification solution company. At our Mason City, Iowa, headquarters we work to serve our customers the best solution by making sure that the product, technology, and application fulfills the customer’s desire and expectations. Metalcraft has another location in Clear Lake, Iowa, called Ark Business systems that helps customers integrate their new identification solution into a world full of technology. One new venture includes getting a facility in Ames that will help supply our headquarters. By utilizing these three locations and specialties we can better provide our customers a complete identification solution experience. Metalcraft continues to grow our number of members and strive to be the best.

What is unique about Metalcraft?
One thing that makes Metalcraft unique is being member-owned. As a member-owned company, each person holds each other accountable to make the highest quality product and serve our customers as best we can. Metalcraft members commit to innovation that helps other members and innovation that helps our customers. We continue to push our automation to the limit to increase productivity and a quality customer experience from start to finish. Metalcraft members are passionate about getting the job done right the first time, and better the next time. We serve our customers as if they were employees and our employees as if they were family.

What engineering divisions does Metalcraft hire?
We hire from most of the engineering divisions. We need skills that align most with software, computer, electrical, industrial, manufacturing, material, and mechanical engineering.

What engineering challenges does Metalcraft face?
The current engineering challenges are improving automation and improving quality. Metalcraft wants our members to be happy, healthy, and efficient. Automation continues to help reduce repetitive tasks and it helps reduce the time spent focusing on tasks that are not an efficient use of the members time. Automation contributes to the quality aspect as well. We use automation to minimize the amount of parts of the process that increase the chance of mistakes. Producing quality products for our customers is part of our Metalcraft mantra. We want our customers to experience the best and that includes the final product.
Company Highlight:

Metalcraft

What is Metalcraft looking for when hiring an engineering intern/full-time employee?
Metalcraft searches for problem-solvers. We want people that are not afraid to innovate, create, and make a difference by creating solutions. Metalcraft expects engineers to help our members with daily problems and assist in designing comprehensive scalable solutions to offer our customers.

ON FACEBOOK?
Join our E-APP Facebook group to stay connected to what’s going on in the College of Engineering and across the Iowa State University campus. Highlights include events, awards, class projects, and competitions. We’ll try to post new items at least once each week.

TRANSFER ADMISSION PROCESS CHECKLIST
Keep up on important deadlines – stay on track by following the guidelines recommended on the transfer application checklist. As an E-APP member, you are one step closer to being admitted to Iowa State, but you must still officially apply for admission. You can complete that first step as early as one year in advance of your intended ISU start date.
