Figure 1: Stress Plot Pop-up Window

A stress plot will appear on the screen.

Double click on the appropriate plot icon at the left of the screen to select the plot Click on **FEM / Results/ Probe ...**

Click on any point where you want to know the value of the stress.

The value will be displayed on the part as well as in a pop up menu. (Figure 2) You can continue to click wherever you need to find values.
